HC3 Make A Statement

We help Financial Institutions create statement efficiencies that align with their unique needs, reducing costs and saving time with a smarter approach to statement processing. By outsourcing bank statements with HC3, 700+ financial institutions leverage document design, digital delivery, and print delivery that better reflects their brand.

We earn and retain clients through our ability to optimize internal workflows, modernize statement design, ensure seamless technology integration with major core and OLB providers, and grow with our clients. With HC3, you gain efficiency and a strategic partner committed to your success.

"HC3 assisted us in modernizing our bank statements while also making them a key component of our customer communication. We were able to strengthen relationships while continuing to provide top-tier service." - **Middletown Valley Bank, Maryland**

Enhanced Statement Design

We design statements and customer communications that reinforce your brand identity and communicate key financial data, giving your customers insights to help them make progress on their financial journey.

- Full-color design
- Clear customer focal points
- Account summary with key data
- Single line transaction detail
- Targeted marketing

Digital Delivery

Our eStatement solution offers intuitive navigation for customers to view through various document types, search transaction history, and manage their document repository.

- Single Sign-On or API integration
- Enrollment management
- Email and text notifications
- Search and filter capabilities
- Individual and bulk downloads

HC3 Make A Statement

Print and Mail Delivery

Our clients reduce material and postage costs by outsourcing their statements and notices with HC3. All of our facilities are qualified by the USPS for seamless entry, meaning your customers' mail is in the mail stream as soon as it leaves HC3's facility. Take advantage of our presort postage rates for greater cost savings.

Unmatched Security

Document-specific data is barcoded onto each piece of a mailing. Multiple high-speed cameras count, scan, and audit the mail pieces as they are folded and inserted for letter and flat packages. If a mismatch occurs, our system immediately stops the insertion process, ensuring complete document integrity.

- Double Postcard
- Open Window Envelope
- Mail Tracking
- Return Mail

"We needed a solution to streamline our operations and provide a more cohesive experience for our customers across both digital and print channels."

- First State Community Bank, Missouri

Gain Customer Insights

HC3 Connect gives you access to job tracking, reporting, and client ticketing. Through HC3's administrative interface, the internal bank user can perform system configurations for customer service, research and dashboards, oversight functions, and audit tracking.

- Job tracking, mail tracking, proofing
- Notification management
- Access to HC3 tools
- Document archive 24+ months
- Track customer enrollment statistics
- User access and audit logs
