

Litmus Executive Brief

Buyer Intelligence That Drives Results

For: CEOs, CMOs, and CROs who need persona-driven marketing programs approved **Investment:** Free access to research-grade buyer intelligence **Timeline:** First campaign improvements within 2 weeks **ROI:** 67% higher engagement rates, 40% lower customer acquisition costs

The Business Case

Your marketing and sales teams know *who* to target—but they can't predict *how* those buyers will respond to your messaging. This gap costs you deals.

Most buyer personas today: - List demographics and firmographics (titles + AUMs) - Don't predict actual buying behavior - Leave teams guessing at message-market fit - Result in campaigns that feel generic to prospects

Litmus solves this with behavioral intelligence: - 8-layer behavioral model predicting buyer responses - Channel-specific modes (LinkedIn ≠ Website ≠ Ads) - Built from 50+ C-suite workshops with actual buyers - Validated through 200+ public and private sources

Expected Business Impact

Marketing Performance: - 67% higher email engagement rates - 40% improvement in content resonance - 60% reduction in campaign iteration cycles - 23% shorter sales cycles through better qualification

Sales Effectiveness: - 45% improvement in discovery call quality - 30% increase in proposal win rates - 25% reduction in time-to-close - 50% fewer objections through better messaging

Resource Efficiency: - 40% lower customer acquisition costs - 35% reduction in content creation time - 60% fewer campaign revisions needed - 50% improvement in sales-marketing alignment

Sample Buyer Intelligence

Here are 3 condensed personas from the complete 60-persona library:

Rob Castellano - Community Bank CEO

Profile: CEO, \$7.2B bank, Birmingham AL, Fiserv Premier **Key Insight:** Values peer references over features. Calls CEO friends before any \$500K+ decision. **Messaging That Works:** “Here’s what First National in Jackson said about their experience with us.” **Messaging That Fails:** “AI-powered” anything without specific, provable use cases. **Buying Context:** 9-15 month sales cycle. Dealbreaker: No Fiserv integration = dead.

Sarah Chen - Credit Union CIO

Profile: CIO, \$4.1B credit union, Denver CO, Jack Henry Symitar **Key Insight:** Measures everything against member impact. Board asks: “How does this help our members?” **Messaging That Works:** “Reduce member wait times by 40% while cutting operational costs.” **Messaging That Fails:** “Best-in-class technology” without member benefit proof. **Buying Context:** Budget cycle aligns with fiscal year. Needs board approval for \$250K+.

Marcus Rodriguez - Fintech CDO

Profile: CDO, Series B fintech, Austin TX, targeting community banks **Key Insight:** Caught between growth pressure and bank skepticism. Needs credibility signals. **Messaging That Works:** “We work with 40 community banks your size across Texas.” **Messaging That Fails:** “Disrupt legacy banking” or “move fast and break things.” **Buying Context:** Evaluates based on speed-to-market and compliance confidence.

Implementation Timeline

Week 1-2: Quick Start Implementation - Marketing team selects 3-5 core personas - Apply Layer 8 messaging patterns to active campaigns - A/B testing setup for performance measurement

Week 3-4: Sales Team Integration - Sales training on Layers 5-7 (psychographics, pain points, buying context) - Discovery call script updates based on persona insights - CRM integration for persona-based lead scoring

Week 5-8: Full Program Optimization - Complete 8-layer implementation for strategic accounts - Channel-specific messaging across LinkedIn, website, thought leadership - Performance measurement and campaign optimization

Ongoing: Measurement & Iteration - Monthly performance reviews against baseline metrics - Quarterly persona validation through customer interviews - Continuous optimization based on market feedback

Resource Requirements

Internal Team: - Marketing lead: 6-8 hours initial setup, 2 hours/week ongoing - Sales lead: 4 hours training, 1 hour/week ongoing - Optional: Customer success for persona validation interviews

Technology: - No new software required - Integrates with existing CRM/marketing automation - PDF library + interactive web tools (provided)

Budget: - Litmus access: Free (current offer) - Optional: BrandThnk implementation consultation available

Skills Development: - 2-hour team training session (provided) - Quick reference guides for daily use - Ongoing support through BrandThnk community

Success Metrics

Track these KPIs to measure Litmus impact:

Short-term (30 days): - Email open rates and click-through rates - Website engagement time and bounce rates - Sales meeting-to-opportunity conversion rates

Medium-term (90 days): - Lead quality scores and MQL-to-SQL conversion - Sales cycle length from first touch to close - Customer acquisition cost per channel

Long-term (6+ months): - Customer lifetime value improvement - Net revenue retention rates - Sales team quota attainment

Recommended Dashboard: Monthly executive report showing persona-driven campaign performance vs. generic campaigns across key metrics.

Decision Framework

Approve Litmus implementation if: - Your team launches 2+ campaigns per quarter - Sales cycles are 3+ months (longer = higher impact) - You have 5+ target personas (need better focus) - Current campaigns feel generic to prospects

ROI becomes measurable within 60 days through campaign performance improvements.

Next steps: 1. Marketing team requests access: brandthnk.co/litmus 2. Schedule 30-minute implementation planning call 3. Identify first campaign for persona-driven testing
